- 2) In the screen, click the control that you want to edit.
- 3) The parameters of the selected control are shown in the parameter edit area in the lower right pane. This is where you can edit the parameters.

What are scene data and scene sets?

Parameters are assigned to the controls (sliders, knobs, X-Y pad, etc.) of a Korg MIDI controller. These parameter assignments are collectively called “scene data.”

Some Korg MIDI controllers have more than one scene; a collection of these scenes is called a “scene set.”

Writing scene data into your Korg MIDI controller

In order for the parameters that you’ve edited in the KORG KONTROL Editor to be reflected in your Korg MIDI controller, you’ll need to write the edited scene data into the Korg MIDI controller. Here’s how: From the “Send” menu, choose “Write Scene Data.” A confirmation dialog box will appear, then click the OK button.

 Do not use your Korg MIDI controller or the KORG KONTROL Editor while any data is being transmitted.
