

Additional Musical Resources] Arabic, Turkish, Farsi

Pa600QT includes additional Sound and Style data in the User area, that are intended to show the power of this instrument and its use in Middle Eastern music. A set of Demo Songs (marked with the “ QT ”suffix) will let you immediately appreciate the new data.

You are free to customize the User banks as you like. Beware, however, that Demo Songs, Styles, Pads and Performances may no longer play with the right Sounds, if you load new data over the QT User data.

If you modify the User banks, you can restore the original data by using the Factory Restore command (in the Media mode). Be warned that this operation will delete any custom data, by reinstalling the original content. Please see the User Manual for more information.

Additional data courtesy of Fadi Saade and Hani Damiri from Lebanon) **MG**, Cüneyt Erta çof Can Elektronik (Turkey) **TR**, Sina Tahmasbpour, Meysam AhmadiFar and Ali Rostami of Korg Persia) **IR**.
